

Recycling Research & Development Proposals

Cochise County

“Cochise County Recycling Feasibility Study”

Richard Searle

1415 Melody Lane, Bldg. G

Bisbee, AZ 85603

Requested Funding: \$60,000

Cochise County will receive funding to hire a professional consultant to develop a feasibility study on recycling within the County of Cochise, with special focus on the establishment of a permanent Material Recovery Facility (MRF), electronic equipment and personal electronics recycling, and construction and demolition debris. Since the early 1990's several recycling efforts have been conducted in Cochise County primarily by private companies and have proved to be unsuccessful – leading to discontinued operation. This feasibility study will research and address the needs of both urban and rural environments. Emphasis will also be placed on establishing a permanent Material Recovery Facility at the Western Regional Landfill. Requested funding will be used to hire a professional consultant to conduct the proposed study.
